Food for thought.....!

What does the Construction Industry really do?

Does it effectively merge engineering, technological, information and systems requirements?

What tools does it need to succeed and is it lacking them?

What is the Construction Industry About?

Design?

Estimating?

Planning?

Building?

Project Management?

Quality Assurance?

Maintenance?

Safety?

**Does it use and merge technologies
effectively?**

Well.....

Does it???

What tools does it need and has it got them?

Laptops, PDA's, Data Capture Devices

CAD, 3D Technology and Beyond

Costing and Bidding Systems

Enterprise Systems

Project Management

Resource Management

Messaging (Mail, IM, UM)/Communication (P2PVC)

Document, Information and Knowledge Management

Collaborative Platforms (Shared Intellectual Wealth)

Change – a threat or an opportunity?

**“It is not the strongest of the species that survive, nor the most intelligent, but the one most responsive to change”
Charles Darwin**
